**DETAILED ACTION**

**EXAMINER'S AMENDMENT**

1. An extension of time under 37 CFR 1.136(a) is required in order to make an examiner's amendment which places this application in condition for allowance. During a telephone conversation conducted on September 3rd, 2004, Fred Strickland requested an extension of time for 1 MONTH(S) and authorized the Director to charge Deposit Account No. 04-1928 the required fee of \$110 for this extension and authorized the following examiner's amendment. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: with

2. IN THE CLAIMS

Cancel claims 1-16

Add new claims 17-21 according to the attachment provided.

***Response to Amendment***

3. Applicant's After Final amendment and accompanying remarks have been fully considered and entered. Claims 1-16 have been canceled and new claims 17-21 have been added as requested. As previously set forth in section 4 of the last Office Action, claims 4 and 7-10 were objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. As such, Applicant has rewritten dependent claims 4 and 7-10 as new claims

17-21. Accordingly, Applicant's amendments are now found patentably distinguishable over the prior art of record for reasons set forth herein below.

***Allowable Subject Matter***

4. The following is an examiner's statement of reasons for allowance: Claims 17-21.

Specifically, the prior art of Caldwell fails teach an ethylene methyl acrylate first polymer as set forth in independent claim 17 or a first polymer selected from the group consisting of ethylene copolymer having a total comonomer content of at least 35 weight percent; thermoplastic elastomers having a shore A hardness of 90 or less; fully cross-linked rubber polymers having a Shore A hardness of 90 or less; and polyvinyl chloride having a Shore A hardness of 90 or less as set forth in independent claim 18. In addition the prior art of Caldwell fails to teach a second polymer selected from the group consisting of ethylene copolymer, polyethylene, polypropylene, polyvinyl chloride, polypropylene/ethylene propylene diene monomer and styrene ethylene butylene styrene. An updated art search did not produce any new substantial art for which to base a rejection and presently no motivation exists to form an obvious type rejection.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
